

Common Garden Pests

Listed below are the most common pests — critters (including insects, slugs, rabbits), fungi and diseases — we deal with in our garden. Each pest contains a hyperlink that connects to a page specific to that pest. It contains photos of that pest and the damage it causes — to help in identification of the problem — and information on methods for controlling the pest.

Critters	Fungi	Diseases & other disorders
<u>Aphids</u>	<u>Powderly Mildew</u>	<u>Blight</u>
<u>Slugs</u>	<u>Damping Off</u>	<u>Verticillium Wilt</u>
<u>Cabbage Loopers</u>	<u>Leaf Spot</u>	<u>Blossom End Rot</u>
<u>Cabbage Worms</u>	<u>Rust</u>	
<u>Cucumber Beetles</u>		
<u>Cutworms</u>		
<u>Flea Beetles</u>		
<u>Leaf Miners</u>		
<u>Root Maggots</u>		
<u>Squash Bugs</u>		
<u>Whiteflies</u>		
<u>Birds</u>
